Meeting Minutes
Group Number: 39
Meeting Date: 28 February 2017
Checkpoint Meeting? Yes
Next Meeting: 7 March 2017

Attendance:
Present: P | Absence (Approved): AA | Absence (Uninformed): A

Name	Present?
Hasnain Bukhari	P
Orri Jonsson	P
Ajiri Owuasu	P
Tanzil Lashkor	P

Progress Review (From Last Meeting):
Completed: C | Ongoing: O | No Report: N

Name	Task(s)	Status
Hasnain Bukhari	Continue work on commenting code, plus adding more functionality and polish to the view customer page. Along with continuing work on other code for the main customer page.	C
Orri Jonsson	Need to polish GUI work, and work on the table view of the GUI and have it display the vehicle records properly. Also need to improve it so multiple records can be selected and then viewed / modified	C
Ajiri Owuasu	Continue polishing the parts module work, especially in regards to the class logic in the functions and fixing any and all errors in the database connection.	C
Tanzil Lashkor	Allow proper interaction with the table in the GUI, and have it display proper data from the loaded database as described in the documents.	C

Plans (For Next Meeting):
Completed: C | Ongoing: O | No Report: N

Name	Task(s)	Status
Hasnain Bukhari	Finish new gui for delete customer and implement, add a new view for view customer which shows all the customers bookings, finish manage users edit password	O
Orri Jonsson	Make sure that selecting multiple vehicles in the tables and clicking on view and or edit buttons will open the view or edit pages for all selected records. Add better comments to code and make sure it is organized properly.	O
Ajiri Owuasu	Finalize the logic of the module, and focus work on finishing the implementation and functionality.	O
Tanzil Lashkor	Finish the edit and delete option of my module and start working on the search feature for bookings.	O

Issues:

Name:	Risks and issues:
Hasnain Bukhari	Passing data between controllers results in problems like after a customer has been deleted we need refresh the main view, deleting customers should delete everything associated with that customer across other tables as well which could lead to problems.
Orri Jonsson	The library being used for the GUI might not be able to support opening multiple windows at a time like how it should when multiple records have selected, in this case another implementation needs to be made.
Ajiri Owuasu	Requirement 9 for the module has room for interpretation. So coming up with a simple and logical way an end user can

	delete bookings which have parts will be critical to do.
Tanzil Lashkor	Search feature may bring the wrong data into the table which in turn can lead to the wrong data being manipulated and stored in the database. Make sure the data being searched for is valid.
